

FormStorm Enterprise

Form Processing that Works

*'Are you processing large quantities of paper forms?
Would you like to reduce operating costs, increase
efficiency and speed up turn around?'*

With FormStorm Enterprise you can and much more, all within one flexible, affordable and intuitive system.

'15 page questionnaires processed in 7 seconds'

In a recent project our client (a bureau) was under pressure to process 14,795 council questionnaires, each containing 15 double sided pages with a total of 300 check box fields and 30 fields completed in hand print.

They had a very tight budget imposed by their client and after obtaining quotes from several outsourcing companies, soon realised they would not be able meet the customers price expectations. Fortunately they came across our website and spotted the potential of FormStorm.

We helped them create a system that processed each questionnaire in just under 7 seconds. Any uncertain check box fields and the extracted hand printed fields, were sent to an operator and validated. The data was then automatically output to CSV files.

After numerous quality control tests our customer was amazed at the accuracy of the results and said it had surpassed any previous methods of extraction.

'Some comments from our customers'

"The solution implemented by CMS has been reliable and has met all our objectives. We are now able to capture, verify and interrogate the data better than ever. Their customer service has been outstanding with any issue being resolved promptly. For anyone with the same needs I would happily recommend them."

Elliot Harrison, Data Office SSAT (Specialist Schools and Academies Trust)

"I have found FormStorm to be a perfect answer to our form capture needs, adaptable, efficient and affordable. My dealings with CMS have also been excellent, they created a robust processing system for us under very tight time constraints within the agreed time frame and budget."

David McQuillan, Services Manager. Mallon Technology

'Some of the key benefits'

- Full integration with industry standard scanners using TWAIN. Allows for fast double sided scanning with built in orientation correction, missing form detection and auto form reorder.
- Auto/manual import from file – TIF uncompressed, Group 3 & 4, BMP, JPEG, PDF, gray scale.
- Highly advanced template recognition.
- Fast extraction of data such as barcodes, check box, printed text and handwritten characters.
- Electronic distribution of documents that require further validation.
- Enables scripts and validation rules to be applied at any stage to ensure data integrity.
- Includes supervisor, quality control, operator performance and system statistics modules.
- Exports to all major database formats, CSV, XML and more. Images exported in TIF, JPEG or PDF
- FormStorm is compatible with Citrix and Terminal services, so jobs can be securely distributed electronically to remote users.

'Thank you'

We are sure you will find FormStorm Enterprise an excellent product which will truly transform the way you process documents.
