Document Management System For Healthcare

*'A flexible and sophisticated solution
to the problem of storing and
Retrieving documents
of all types'*

CMS Software provides a complete electronic document management system, designed to ease the pressure of managing everyday paperwork within any healthcare department.

Our systems enable you to overcome the challenges of archiving large amounts of diverse document types into a searchable repository whilst delivering real cost saving benefits.

For over 10 years our solutions have been successfully implemented in major hospitals and have reliably archived millions of documents.

“...CMS Software did what we expected and a whole lot more...the WinPath link proved to be very helpful...at a recent staff meeting the view was that the Laboratory cannot do without the software...”

John Pullicino, Pathology IS Manager, Queen Elizabeth Greenwich on implementation of our system.

Key Benefits

- Automatic filing of documents.
- Dramatic reduction in costs.
- Fast desktop access to test requests and other form types.
- Better utilization of skilled staff time.
- Elimination of physical storage.
- Improved job satisfaction.
- Improved response time to GP / Staff queries.
- Stores all types of forms including electronic documents, such as Word, Excel, PDF etc.
- Supports multiple sites.
- Secure and audited system.
- Supports Digital Imaging and Communications in Medicine (DICOM) files.
- Document redaction feature for email, print, fax etc
- Flexible interface for viewing documents directly from your own laboratory system. Already configured systems include: **iLab TP by iSoft and Winpath by Clinisys.**
- Bureau service available to back scan existing document archives.

CMS Software Ltd

Capture

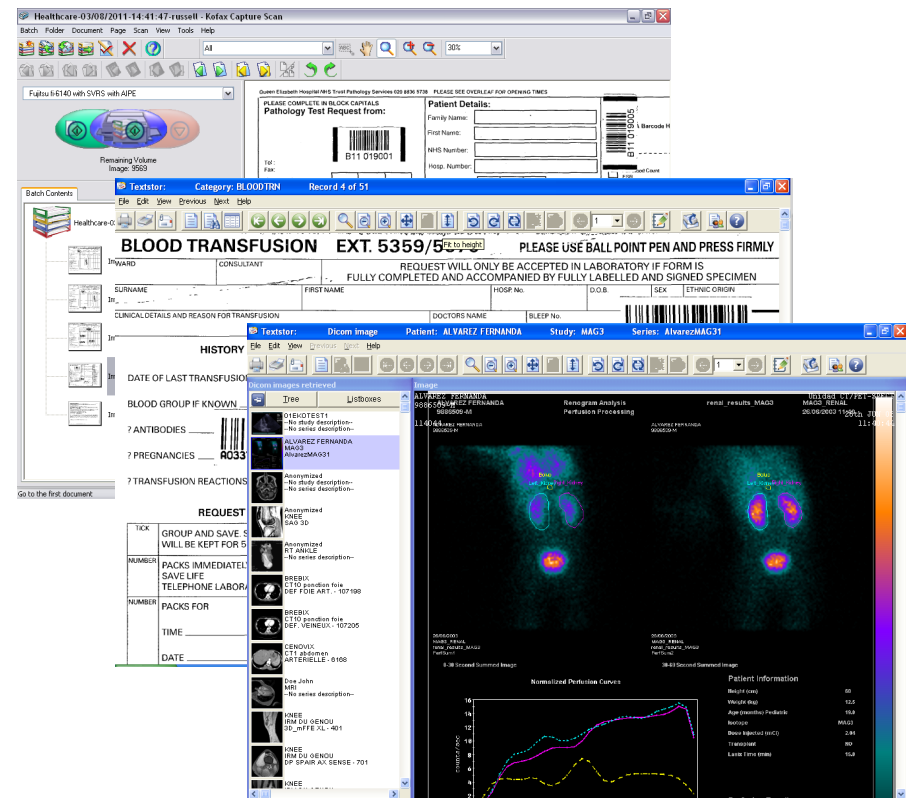

- Documents are scanned using the latest image enhancement tools. This allows faint, dark or coloured forms to be individually adjusted to the best quality without the need to separate or manually adjust.
- Our scanners digitise documents at a minimum rate of 40 pages per minute (double sided).

Recognition

- A large range of barcode symbologies are supported. Multiple barcodes on a single page are read fast and effortlessly. Advanced bar-code validation and filtering rules can be configured.
- Supports extraction of printed characters, optical marks (check boxes etc) and handwritten text (cursive and non cursive).
- Imports text information from business systems and devices such as calibration and diagnostic reports from lab analysis equipment.

Retrieve

- Documents can be retrieved quickly and efficiently from any workstation.
- Configurable interface for viewing documents from clients own management system.
- Licensing is controlled by the number of users logged into the system at any one time.
- Users permissions can be controlled on a user / group basis.
- Multiple site support.
- Also supports Digital Imaging and Communications in Medicine (DICOM) files.
